Operation Instructions

Connect / Disconnect the Wireless Remote Switch

(The pairing between the Wireless Tailcap and the Wireless Remote Switch is preset in the factory.)

As illustrated, unscrew the original tailcap of the flashlight and replace it with the Wireless Tailcap. After inserting the battery and tightening the Wireless Tailcap, half press the Wireless Tailcap 3 times, the indicator on the tailcap will fade in and out, informing the user that the Wireless Remote Switch has been connected with the flashlight. After connecting, half press the Wireless Tailcap 3 times again, the Wireless Remote Switch will be disconnected.

Note:

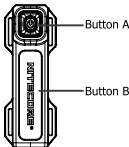

- The maximum signal range between the Wireless Tailcap and the Wireless Remote Switch is 1m (3.28ft) when there are no obstacles blocking the path.
- The Wireless Remote Switch is powered by 1 x 3V CR1632 button cell battery which enables approx. 4,000 presses. The standby time is approx. 12 months for a new battery. To replace the button cell battery, remove the battery cap of the Wireless Remote Switch with a screwdriver or a key.
- Fully tighten the Wireless Tailcap to the flashlight tube. The flashlight or the Wireless Remote Switch will not work properly otherwise.

Pairing Instructions

The pairing between the Wireless Tailcap and the Wireless Remote Switch is preset in the factory. Please follow the steps below if you need to re-pair them.

- After inserting the battery and tightening the Wireless Tailcap, half press the Wireless Tailcap 5 times, the indicator on the Wireless Tailcap will flash quickly to indicate the access to the pair pending status.
- After accessing the pair pending status, press both Button A and Button B of the Wireless Remote Switch until the flashlight becomes steadily turned on.

Note:

- After accessing the pair pending status, the flashlight will return to the standby status if it fails to be paired within 5 minutes.
- If the flashlight is turned on after accessing the pair pending status, it will automatically exit the status.
- Make sure the distance between the flashlight and the Wireless Remote Switch is within 1m during the pairing process.
- Replace or recharge the battery when the battery power of the flashlight is low. Changing the battery does not remove the pairing between the flashlight and the Wireless Remote Switch.
